---

Good afternoon,

The Pre-RD group is currently sampling the middle interval of the T07Nav substation along Transect 7 (RM 16.5). The crew is expecting to sample the bottom interval after 4:15pm, which might lead them to work into civil twilight. The Pre-RD has been reminded that night work is a deviation from the FSP and HASP and has not been approved by EPA. The crew responded, that their interpretation of civil twilight is from 5:07pm through 5:30pm and that they plan to sample until then.

Included is a photo of the crew sampling at Transect 7

Jonni
